VOLUME 16 NUMBER 6 DECEMBER 1976 (PART II)

TAMS JOURNAL

Official Organ of the Token and Medal Society

amusement tokens of the minneapolis st paul area

by Kenneth R. Smith

amusement tokens of the minneapolis st paul area

by Kenneth R. Smith

The pinball machine craze hit Minnesota's twin cities in the early 1930s and, at first, rewarded winners with money. However, this gambling was quickly outlawed.

To circumvent the law, pinball machine operators ordered nickel size tokens most of which read "good for 5¢ in trade," but these were also outlawed. The pinball machine operators then resorted to nickel size (21mm) with identical or dissimilar legends on both sides. The complaint against these tokens was that their nickel size implied they were good for a nickel. Token manufacturers then went to a 20mm token, which remained as the principal amusement machine token in the twin cities for about 10 years. Tokens of 22 and 23mm diameters usually were given for five free plays.

The tokens were usually made in lots of 100, 200, 500 or 1000. To my knowledge no individual bar or tavern ordered more than 1,000 tokens of any type with their name or initials. The usual order was 200 tokens, with 100 token lots the next most popular order. At most establishments the tokens could not be purchased, but were dispensed from the machine for a high score. They could be used for replay or, at some bars, if the friendly bartender knew the customer, he would redeem them for cash. Many establishments which did not want the publicity used only one, two, or three initials and/or their street address number. These latter tokens so far are not positively identified as to location of use and are listed as Twin City Area tokens without identification.

It was common practice to "slug" machines with tokens from other taverns. The stray tokens in many cases were then sent to a token exchange such as the one operated by the Midwest Novelty & Supply Co. in St. Paul. There still may be jars in basements of former tavern owners containing a mixture of tavern tokens.

When filling token orders, it was common practice to produce an excess of the number actually requested, then select the best pieces to fill the order. Mutilated and off-center tokens were put into the melt box, the remainder in the sample boxes. These were two types of sample boxes: Type 1 was for merchants tokens not used as amusement tokens, and Type 2 was for tokens used as amusement tokens, even they carried the "good for 5¢ in trade.". When a die was set up and before the token run, it was the practice to take a few tokens of that size and shape from a sample box and overstamp to check the die. When these tokens were taken from the Type 1 box and overstamped they were thrown into the melt box. Thus, tokens overstamped on merchant non- amusement tokens are very rare from the Twin Cities. Of more than 6000 overstamped tokens examined, less than 20 were over non-amusement merchant tokens. One is over a very rare parking meter token of Sioux City, Iowa, and none are over transportation tokens. If the tokens were taken from a Type 2 amusement token box and overstamped to check the die, they were often returned to the amusement token sample boxes. There are amusement tokens with two or three different understampings. These four or three multiple stampings are not common because if a token was restamped several times it usually cracked and went into the melt box.

In late 1942 and early 1943, token manufacturers in the Twin Cities had run out of token blanks (World War II shortage) and took most of the tokens (if not all) from the Type 2 amusement sample and die checking boxes and overstamped to fill orders. If what I was told was correct, about 20,000 tokens were overstamped and released, mostly to taverns in Saint Paul.

By 1946, when token blanks were available again, the pinball machine craze had run its course in the Twin Cities and few pinball tokens were made thereafter. The Commercial slug law of 1944, which marked the demise of most telephone tokens, also put a severe crimp in the use of amusement tokens dispensed by machines after 1945. During the war years, when token blanks were not available, zinc, steel, plastic and fiber tokens were made, but proved very unsatisfactory. The machines quickly mutilated them, or they corroded. Today they are scarce in fine and better conditions.

All tokens in this article will be identified by three- digit code so that, when overstamped tokens are discussed in later articles, the 6,000-plus overstamped tokens in my collection and others can be simply listed per counterstamped token as one liners: 54 OAXY over 820M, 730B over 760ACK, 760BCK over 760KAC, etc.

Behind the item code appears first the metal for that token: A=Aluminum, B=Brass, BI=Bimetal, Bz=Bronze, K=Copper, NB=nickel plated brass, S=Steel (Iron), SB=silver plated brass, Wm=Nickel and Z=Zinc. The text numbers are the diameter of the token to the nearest mm size. Note that nickel size tokens are listed as 21mm, quarter size as 25mm, penny size as 19mm, and dime size as 18mm. Behind the mm size is whether the token is solid or punched: Sd=solid; Ch=punched center holed; Pc=pierced, or ( )-sc where ( ) is stamped out of the token.

What is omitted in this article and will be covered in future articles are the amusement tokens which read "good for 5¢ in trade" on their reverses, counterstamped tokens, and tokens with only one and two initials. This article covers first the tokens of Minneapolis, then St. Paul, then tokens from Minneapolis/St. Paul suburbs, and finishes with listings of probable Twin City area tokens whose location of use is unknown.

At present these tokens, with few exceptions, have an average selling, buying or trading price of 20 cents apiece. The exceptions are the bimetal, zinc, and steel tokens, which bring 50 cents apiece, and the fiber tokens at $1 each. Also the tokens issued by boxers Mike O'Dowd and Tommy Gibbons are in heavy demand by sports token collectors and bring from $1 to $5 each. The other sports tokens are not in demand, worth about 20 cents each.

Work is progressing on detecting which tokens are stamped over other tokens, so that a list can be made of the probable sequence in which most of these tokens were originally made by the manufacturer.

I wish to thank Calvin Woods for his contributions. He contributed token listings and considerable information on locations of various establishments.

I would like to acquire any additional information for future listings on listed and unlisted tokens, their usage, locations and availability. Please send this information to Kenneth Smith, 328 Avenue F, Redondo Beach, Ca. 90277.

TOKEN and MEDAL SOCIETY

GENERAL INFORMATION

FROM AN IDEA born in 1952, the Token and Medal Society (TAMS) became a reality on Nov. 19, 1960 when an organization meeting was held by a group of interested persons in Detroit, Michigan, during the Central States Numismatic Society Convention. ORIGINALLY the organization was called "The Society of Medal, Token and Obsolete Paper Money Collectors" but this was changed by vote of the membership in December, 1961, to the present Token and Medal Society. Incorporated in 1966, TAMS received IRS non-profit, tax-exempt status in 1967.

EXONUMISTS, as TAMS members are known, is a word coined by Russ Rulau and unofficially adopted for use by TAMS. Accordingly the collecting and study of tokens and medals is known as "exonumia."

The aims of TAMS are:

1. To promote and stimulate the study of tokens and medals.
2. To cultivate fraternal collector relations.
3. To encourage research and articles and recordings pertaining thereto.
4. To disperse information and knowledge in a society journal.
5. To advance interest and prestige.
6. To promote meetings at conventions.
7. To promote and encourage distinct classification at exhibits.
8. To endeavor to determine values of rarities.
9. To permanently record historical information relating to tokens and medals by publishing original works by members; and by reprinting old works not readily available to average collectors.

NEW MEMBERS — Application for membership in TAMS shall be on regular forms available from the Secretary. New members should send $6 with application to cover first years dues.

Life membership in Token and Medal Society was established in 1969 with a fee of $80 and regular membership in TAMS for a minimum of 3 years. In 1973, fee was raised to $120, and 3 year membership requirement was waived.

DUES — Dues of $6 are payable annually to the Treasurer, no later than March 31 of each year.

Associate memberships for additional members of the family are available at $1.00 each, however, associate members cannot hold office, nor do they receive a copy of the Token and Medal Society Journal.

OUR TAMS JOURNAL is mailed to every member as part of his membership dues. The first JOURNAL was published in April 1961, and was mailed at least quarterly until 1966 when we began publishing six JOURNALS annually. Numerous back issues are available, at $1 per copy from the Secretary, with funds accompanying request. ADVERTISING is accepted, both display and classified. Contact JOURNAL EDITOR for information. Articles for the Journal should be submitted to the Journal Editor for approval as far in advance of desired publication date as possible.

BACK ISSUES — A number of back issues are currently available. However, a few editions are in short supply. Members interested in obtaining certain issues should contact the secretary for availability and price.

The following issues are offered for sale:

TAMS LIBRARY is in the capable hands of Irene Alexander. Donations of books and/or funds to the TAMS Library are always welcome, and TAMS-ters are invited to borrow from the library as their needs require. Over 400 different titles are currently available for loan.

TOKEN AND MEDAL SOCIETY maintains a continuous membership in the American Numismatic Association (ANA) and holds ANA Membership Number 47142.

ANNUAL MEETING — An annual meeting of the General membership is held in conjunction with American Numismatic Association convention. Election of officers by mail ballot was instituted in 1974, with new officers being elected every two years. By-laws spell out specific rules for election.

Following the organizational meeting in Detroit in 1960 general membership meetings have been held in Atlanta in 1961; Detroit, 1962; Denver, 1963; Cleveland, 1964; Houston, 1965; Chicago, 1966; Miami Beach, 1967; San Diego, 1968; Philadelphia, 1969; St. Louis, 1970; Washington D.C., 1971; New Orleans, 1972; Boston, 1973, Bal Harbour, Fla. in 1974; 1975, New York City, 1976.

With the exception of 1962 and 1963, ASSEMBLAGE MEDALS have been struck each year, and since 1967, have been sold by subscription only. There are a few bronze medals remaining for years 1964 and 1966, and may be purchased for $1 each by contacting Clifford Mishler, P.O. Box 316, Iola, Wisconsin 54945.

AWARDS — To the first place winner in the token division at the annual convention, the B.P. Wright (An ANA award sponsored by TAMS); for the best articles appearing in the previous years TAMS Journal, the silver and bronze literary awards; for the best exhibit of merchant's tokens at the ANA convention, the Donald M. Miller award; for the article in the TAMS Journal that best relates to the original history of tokens and medals, the Joseph M. Segel solid gold Literary Award; to the TAMS member who has contributed most to TAMS and exonumia during the preceding year, the Medallic Art Medal of Merit; and for the best catalog article during the preceding year, the Sandra Rae Mishler award.

REPRINTS of old numismatic literature are being published whenever possible by TAMS and sold to members at a nominal charge. The first three books are completely sold out, but the fourth reprint, "Selected Articles on the Subject of American Tokens" reprinted from 'The Numismatist' (1904-1938) is still available at $6.50 postpaid from the Book Editor.

TAMS GROWTH IS STEADY — charter membership closed at #315 in April 1962, with membership number 580 being reached by Jan. 1962. The growth continued . . . by Jan. 1, 1967, membership #1555 had been issued and to date, November 2, 1976 #3297 has been issued.

DOTTIE DOW PAST PRESIDENT MEDAL

NOW AVAILABLE

The official medal unveiled at this year's annual meeting to mark the presidency of Dottie Dow, 1974-76, is now available at $9 per medal in bronze, at $35 per medal in silver, or at $43 by the pair. Only 25 silver examples were struck.

The following official TAMS medals remain available for sale at the original issue prices:

1964, Cleveland, 500 bronze struck (aprox. 200 remain) . $1
1965, Houston, 500 bronze struck (aprox. 200 remain) . . $1
1966, Chicago, 500 bronze struck (aprox. 200 remain) . . $1
1969, Philadelphia, 250 aluminum struck (aprox. 40 remain) $1.50
1971, Washington, 1876 bronze struck (9 remain) $5
6401 silver struck (9 remain) $15
1973, Boston, 1728 proof bronze struck (14 remain) . . . $5
1976, New York, proof bronze $5
proof silver. $15

The following official TAMS presidential medals remain available at $8 each for the bronze, $30 each for the silver, and $37 for pairs. After Dec. 31, 1976 the prices will be raised to $9 each for the bronze, $35 each for the silver, and $43 for pairs, as available.

Dr. George Fuld, 1960-62, 100 bronze struck $8
25 silver struck . . . . . SOLD OUT
James J. Curto, 1962-63, 150 bronze struck $8
25 silver struck (2 remain) $30
Paul Hamm, 1963-64, 150 bronze struck. $8
25 silver struck . . . . . SOLD OUT

25 silver struck (2 remain) $30
George D. Hatie, 1970-72, 100 bronze struck $8
25 silver struck . . . . . SOLD OUT
Byron Johnson, 1972-74, 75 bronze struck. $8
25 silver struck $30

The Curto, Mitchell, and Johnson medals may be purchased in pairs at a price of $37

ORDERING INSTRUCTIONS

Make check payable to the TOKEN AND MEDAL SOCIETY and submit order to:

CLIFFORD MISHLER

P.O. BOX 316, IOLA, WI 54945

NEW MEMBERSHIP/ SPECIALTY LISTING BEING ASSEMBLED

The last time we tried to gather information for a membership/specialty listing we had problems, which included among other things, failure by the printer to insert the leaflet into the Journal. Hopefully this time we can do it up right.

In order to obtain the most satisfaction from our hobby we have to share ourselves, and the knowledge we posess, with others. We must somehow let other collectors know that we exist and are intersted in certain collecting areas.

We would like to have you share yourself with others. Please fill out the following form and return it to your Journal editor, Doug Watson.

Comments:

POSTAL service?

The mailing of the October Journal really left something to be desired as far as our government was concerned. Issues of the Journal were placed into the mails on schedule, October 1 . . . I received my copy on October 28th! Of course its quite understandable as Scandinavia is located at least 60 miles from the New Holstein post office.

To get a better idea on the type of service(?) we're receiving from Uncle Sam, jot down the date that you received the December issue, also the October issue too if you can remember the date, and send to the Journal Editor. Perhaps we can put some pressure on the public servants and at least let them know how unhappy we are with the treatment we've been receiving.

Mr. Aaron A. Knee of Charlotte, N.C. invented an adjustable check testing apparatus which he sold to the Vanak Corporation, also of Charlotte. This testing device was attached to vending machines, telephone pay stations, jukeboxes, pinball machines and other equipment which required a nickel-sized token to operate.

One of the main objectives of his invention was to provide a means for testing a token for differences in surface configurations, thickness, and diameter.

This device had the ability for rendering the diameter testing portion inoperative when a special oversized check was inserted. The oversized check would be received and accepted if surface configurations and thickness met certain requirements.

Mr. Knee applied for a patent on this device July 20, 1935, and received Patent No. 2,073,392 on March 9, 1937.

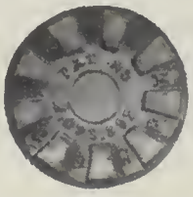
Figure 18 of this patent application shows an oversized type of token having 9 symetrical points on the obverse and reverse which are the identifying characteristics of this particular piece.

For some unknown reason the oversized tokens used to operate these devices were probably struck by the Northwestern Stamp Works of St. Paul, as many are found installed on machines in the Twin Cities. Many of the Vanak checks used on jukeboxes also had 2 parallel grooved incused lines on the checks reverse with different spacing between the groves for different places of business.

The following is a 'probable' listing of these Vanak checks made by the Northwestern Stamp Works for use in the Twin Cities.

(Circle in center with 9 spokes radiating out to edge and on each spoke and incuse letter spelling out VANAK CORP, and stamped PAT PEND in center) (rev.) (Circle in center with 9 spokes radiating out to edge and on each spoke an incuse letter spelling out VANAK CORP) (issued 1935 to 1937)

VNA	B, 22, Sd (var.)
VNB	NB, 22, Sd (var.)



(Circle in center with 9 spokes radiating out to edge and on each spoke an incuse letter spelling out VANAK CORP and stamped Pat No. 2,073,392 in center)
(rev.) (Circle in center with 9 spokes radiating out to edge and on each spoke an incuse letter spelling out ADALKIN CO) (issued 1937 to 1944)

SAINT PAUL (manuf.) 762

Northwestern Stamp Works, 321 Cedar St. This company was the principal maker of pinball machine tokens during the 1930's and 1940's. Volumewise it is estimated that over 50% of the pinball machine tokens made in this period in the United States came from the presses of this company.

The other major producer of pinball machine tokens was L.A. Stamp & Stencil Co. whose tokens usually had large holes or squares cut out. Many pinball machine operators did not order specific tokens for themselves but used various tokens from the Northwestern stocks. These stock tokens, which are listed in Steve Alpert's book, came in about 60 different major types and metals. These stock tokens could be bought cheaply in lots of 100, 200, & 500. Some of the inscriptions on these stock tokens were: NO CASH VALUE, FOR AMUSEMENT ONLY, THIS TOKEN HAS NO CASH OR TRADE VALUE.

Many also had letters like B, J, K, P, R, and S in the center. These tokens will be the subject of a later article about the Northwestern Stamp Works.
